

Microjobengine customization

(I will identify mjob as service page)

This what I need:

1. Friendly url
2. Custom header
3. Custom menu
4. The main price of the service in the service page must be a starting price: es. "Starting from € 25"
5. Slideshow .gif friendly in the service pages
6. Ability to offer discounts and offers
7. Automatic notification system to notify you when a new order has been placed or when a customer needs assistance.
8. Automatic notification system that confirms the payment of the order to the user and provides him with instructions on how to proceed.
9. Automatic notification system that confirms the completion of the requested service to the user and provides him with the link to download the processed file.
10. Privacy policy page to inform customers about the collection and use of their personal data (is there already a draft on MjE?)
11. Terms and conditions page to define the rules of the service and the obligations of the parties involved (does it already exist within MjE?)
12. Backup system to ensure the security of customer data and services provided.
13. Ability for customers to send requests for quotes. es. a contact button with writing "Click for a custom quote"
14. You told me that customers will have to send me photos uploading them to a third party service (e.g. Wetransfer) and then copy&paste the link and send it to me. Would it be possible to include a link to my Wetransfer page in the order page (or the cart page)? This would be very useful for my customers.
15. What is the maximum file size customers can send by the chat? And where I will find these files? On my chat?
16. I need that system for extras that you saw on the service page with notes that I sent you with whatsapp (with pictures quantity)
17. FAQ on the service page
18. Contact Me button on the service page
19. I will need a Wallet with a top-up system: customer replenishes his wallet and uses his funds to buy the services. After each purchase the amount of the purchase will be deducted from his funds
20. Does MjE has a customers data protection system to ensure the security of their personal information and file?
21. Everything must be translatable into Italian
